## **Patagonia Walkabout**

Patagonia, where the scenery in this part of the world is stunning. Think of Queenstown and Central Otago then multiply it by 100 minus all the people. It's just plain spectacular!

We start out by flying from Santiago to Temuco to visit Pucon with its spectacular setting on Lake Villarrica with stunning Mt Villarrica. After a relaxing stop, travel overland through to the Lakes District where there are Crystal clear lakes, spectacular and imposing glaciers, remote and magnificent national parks, combined with endless snow-capped peaks of the Andes not to mention the condors, flamingoes and abundant bird life.

One of the 'must sees' in this remote part of the world is the trip between Puerto Montt in Chile and Bariloche in Argentina. This trip takes us through perfectly conical shaped mountains, deep blue lakes by bus. It must make Mr Kodak smile as everyone is clicking away furiously.

Hike in the spectacular Fitzroy National Park amongst some of the most gorgeous mountain scenery in the world and stay in the cute mountain town of El Chalten.

The glaciers of Perito Moreno in Los Glaciares National Park are awesome. They are the size of Buenos Aires city and display vibrant hues of blue and green and have sculptured icebergs of different sizes.

Next is the stunning Torres del Paine National Park where the granite pillars soar almost vertically above the Patagonian steppe with turquoise lakes, roaring rivers, creeping glaciers and dense forests create a hikers paradise. Enjoy 3 nights right in the park in our stunning eco lodge.

What really takes folk by surprise is the abundant wildlife, guanacos (from the camel family), foxes, condors by the score, flamingoes, rheas, penguins, seals, beavers, all in their natural habitat, as well as, geese, birds and ducks.

Literally at the end of the world, Ushuaia, its setting is astounding with jagged glacial peaks rising dramatically from sea level to 1500m.

Return home via Buenos Aires and explore the Paris of the Americas and the opportunity for an optional side trip to the mighty Iguazu Falls.

The trip is limited to 12 people. The tour costs are based on a minimum of 6 people travelling.

The highest point is at the heart of the ice field between 1.500 and 2.200m. With arid edges and beautiful mountains covered with snow and its dimensions 85km long and 20km wide, this is an amazing sight. Distance: 5 km</p> <p><b>Or</b>  Our goal is to complete the most famous trekking trail in Torres del Paine NP. We walk from the camp site towards Hostería Las Torres and connect with the winding uphill path to Ascencio Valley, the valley which supports the eastern face of the Towersq base. Dry mountain spots, beech forests and small rivers are passed along the scenic walk into the valley. It's not a difficult walk, but energy should nevertheless be saved for the final challenge: the moraine. This mass of boulders is the last guardian before our face to face meeting with the uplifting Torres del Paine. The moraine is sufficiently steep to consider doing it slowly and with an adequate amount of precaution. After a considerable effort, the Towers come into full view, rising majestically before us with the glacial lake visible below. This is one of the most breathtaking sights in the world! The famous Torres del Paine (2, 900 m/ 9, 400 ft) consist of three gigantic granite monoliths, the remains of a great cirque sheared away by the forces of glacial ice. Is there any better place to have lunch? Of course! But since we are in Patagonia, at the feet of the mighty Torres del Paine, we will enjoy life, the view, and a bite to eat! Once everyone is ready, we backtrack along the same trail through Ascencio Valley, and return to the EcoCamp. ### **Note about the Itinerary**

This itinerary is subject to alteration on occurrence of any unpredictable conditions and circumstances which may arise in this delightfully chaotic continent. You will be kept up to date with changes.

### ***A note about the Ecocamp Domes in Torres del Paine National Park***

Patagonia EcoCamp design was inspired on the traditional Kawesqar hut resembling an igloo and a dome at the same time. The instinctive engineering ability of the Kawesqar can be easily understood these days. The semi-hemispherical structure of the EcoCamp domes is formed by a number of isosceles triangles that provides uniform distribution of the stress caused by severe wind loads. Wind speed in Patagonia often surpasses 160-180km per hour which makes traditional straight and flat walls extremely vulnerable if the structure is meant to be light. Other significant aspect is that rounded bodies minimize the external surface in contact with the cold environment allowing less exchange of temperature with the warm interiors. Finally, semi-hemisphere gave Kawesqars the maximum internal space in relation to the surface they had to cover with valuable and sometimes scarce animal skins.

These domes in Torres del Paine have vitrified wooden floors and are 2m/6.5ft high with a diameter of 4m/12ft, allowing plenty of space for sleeping comfortably.

They are resistant to the strongest Patagonian winds, rains, and snow and come equipped with two single beds, fleece sheets, blankets, and feather quilts.

There are round windows in the ceiling to observe the stars of Patagonia before falling asleep.

There are comfortable and well illuminated shared toilets, divided for male and female. Both have showers with hot water, w.c., hand wash, special furniture and warm details that will make you feel at home. Each shower is located inside a closed space where you can dry yourself with privacy. Additionally since the facilities are powered with solar panels generators, there is no electric capacity to plug devices such as hair dryers, electric shavers, etc. You can view the domes on line - <http://ecocamp.travel/en/staying/?ref=standar>

Should you prefer to have a more luxurious Dome with your own bathroom a supplement of NZ\$540 per person applies.
